

300 km/hour  
Nexans cables keep watching.

From signalling and control cables to catenaries and complete power and telecom cabling solutions, Nexans' expertise contributes to your railway and subway networks security. Our cables meet the highest technological performance in terms of signal integrity and

fire safety. They have been conceived to ensure a long operational life.

Years of experience, worldwide, allow us to offer you custom design capabilities, advanced solutions and complete service, locally.

Because so much of your performance runs through cables.
