

NEXANS SECURES THREE-YEAR CONTRACT AS ONE OF THE MAJOR SUPPLIER OF TURCK'S HIGH-PERFORMANCE SENSOR CABLES

PRESS RELEASE

- Nexans Motionline® cables will be used to connect Turck sensors in industrial applications across Europe and China.
- The partnership and technical support were critical factors in Nexans securing the three-year contract as one of Turck's major suppliers of sensor cables.

Paris, March, 22, 2021 – Nexans has secured a three-year contract as a major supplier of high-performance sensor cables for Turck, the leading player in the OEM sensor market across the US, Europe and China. The contract will see Nexans supply its specialized Motionline cables to connect Turck sensors used in a wide variety of industrial monitoring and control applications.

Nexans has developed the Motionline range of cables to provide flexibility, high-performance, reliability and long life in fast-moving dynamic industrial applications. They will be fitted to Turck sensors in applications such as monitoring conveyor belts, tool carrier detection in machining stations and installation in distribution boxes to control machine lighting.

Matthias Hartl, Vice President Global Procurement, of Turck says: *“Awarding this major contract to Nexans is the culmination of a long journey. We were impressed by the quality and competitiveness of the Motionline cables. However, what really made the difference was that Nexans is able to work in partnership with us to provide a high level of technical support. Together we are developing innovative sensor systems that are smaller and lighter to match the needs of the new generation of production equipment.”*

Sven Paier, Nexans Commercial Director for Automation and Automotive, said: *“Nexans is committed to providing state-of-the-art connectivity for industrial automation equipment. Digitalization is vital in achieving that aim and sensors will play a key role. We are therefore delighted that Turck has selected Nexans as a major global partner for sensor cables.”*

The Motionline cables for Turck will feature either polyvinyl chloride (PVC) or polyurethane (PUR) sheathing depending on the specific application. They are rated at 300 V and are UL approved.

About Nexans

Nexans is a global player in energy transition. Our purpose: electrify the future. For over a century, Nexans has played a crucial role in the electrification of the planet. With around 25,000 people in 38 countries, the Group is leading the charge to the new world of electrification: safer, sustainable, renewable, decarbonized and accessible to everyone. In 2020, Nexans generated 5.7 billion euros in standard sales.

The Group designs solutions and services along the entire value chain in three main business areas: Building & Territories (including utilities and emobility), High Voltage & Projects (covering offshore wind farms, subsea interconnections, land high voltage), and Industry & Solutions (including renewables, transportation, oil and gas, automation, and others).

Corporate Social Responsibility is a guiding principle of Nexans' business activities and internal practices. As a signatory of the Global Compact since 2008, Nexans is committed to contribute to a responsible global economy and strives to promote the ten principles defined by the UN to all its stakeholders. The Group pledged to contribute to carbon neutrality by 2030 and was the first cable provider to create a Foundation supporting sustainable initiatives bringing access to energy to disadvantaged communities worldwide. Nexans' commitment to developing ethical, sustainable and high-quality cables also drives its active involvement within leading industry associations, including Europacable, the NEMA, ICF and CIGRE.

Nexans is listed on Euronext Paris, compartment A.
